

H₂PRO™ High Performance Detergent is designed to remove greasy, oily soils and other difficult stains from fabrics cleaned in water.

High Performance Detergent for Wetcleaning & Laundry

H₂PRO High Performance Detergent is a concentrated enzymatic cleaning agent designed for everyday use to clean moderate to heavily soiled items in water. The highly active formulation is especially effective at removing greasy, oily soils, protein stains and starch based food stains in varying water conditions and temperatures as well as suspending those difficult soils until they can be rinsed away.

H₂PRO High Performance Detergent contains a buffering system that protects colors from fading and optical brighteners to ensure whites stay white and colors stay bright.

H₂PRO High Performance Detergent can be used in multiple applications including hand washing, top-loading (home-style) machines, front-loading (high-efficiency) machines, as well as professional laundry and wetcleaning machines.

H₂PRO products are designed to work together for optimal cleaning and finishing results in water.

When water is the best choice, use H₂PRO.

• **Concentrated Formula**

H₂PRO High Performance Detergent is a concentrated professional formulation for use in hand washing, top-load and front-load washing machines, and professional wetcleaning systems.

• **Removes Greasy, Oily Soils**

H₂PRO High Performance Detergent is specifically formulated to break up and remove greasy, oily soils from fabrics cleaned in water, often without the need for pre-treatment.

• **Enzymatic Stain Removal**

H₂PRO High Performance Detergent contains a dual enzyme system that is highly effective on protein stains such as blood, grass and perspiration, as well as starch-based food stains like chocolate, gravy and sauces.

• **Keeps Whites White & Colors Bright**

H₂PRO High Performance Detergent has excellent soil suspension properties to prevent redeposition. A special buffering system helps to protect colors from fading and optical brighteners to keep whites white and colors bright.

• **Effective Performance in Varying Water Conditions**

Whether the water conditions are hard or soft, temperatures warm or cold, H₂PRO High Performance Detergent utilizes an organic builder system to produce consistent cleaning results. Optimal results will be achieved in warm water.

Instructions for Using H₂PRO™ High Performance Detergent

Use H₂PRO High Performance Detergent to remove greasy oily soils, protein stains and starch-based stains in varying water conditions and temperatures.

Before cleaning garments, remove any solvent-soluble or hard-set stains prior to washing using the appropriate Street's stain removers. Refer to care label for water temperature.

Hand Washing

1. Using a clean sink or plastic pail, add 1/4 oz. of H₂PRO High Performance Detergent per gallon of water.
2. Soak lightly soiled fabrics for approximately 15 minutes, gently squeezing the wash water through the fabric periodically. Soak medium to heavily soiled fabrics approximately 30 minutes, squeezing gently periodically.
3. Carefully but thoroughly, squeeze the wash water out of the fabric. DO NOT wring fabric.
4. Using another sink or plastic pail, rinse the fabrics with fresh water. Repeat until rinse water is clear.

Top-Loading (Home-Style) Washers

1. Add H₂PRO High Performance Detergent based on the appropriate water levels below:
 - For HIGH water level (full load) add 2 ozs. to 4 ozs. based on the degree of soiling
 - For MEDIUM water level (medium load) add 1 oz. to 3 ozs. based on the degree of soiling
 - For LOW water level (small load) add 1/2 oz. to 2 ozs. based on the degree of soiling
2. Add soiled fabrics into the wash wheel and select appropriate setting based on care label, fiber content and construction.

Front-Loading (High-Efficiency) Washers

1. Add H₂PRO High Performance Detergent to the detergent dispenser based on the appropriate load levels below:
 - For FULL load add 1 oz. to 1-1/4 oz. detergent based on the degree of soiling
 - For MEDIUM load add 3/4 oz. to 1 oz. detergent based on the degree of soiling
 - For SMALL load add 1/2 oz. to 3/4 oz. detergent based on the degree of soiling
2. Add soiled fabrics into the wash wheel and select appropriate setting based on care label, fiber content and construction.

Professional Laundry or Wetcleaning Machine

1. Add soiled fabrics into the wash wheel and select appropriate setting based on care label, fiber content and construction.
2. Add H₂PRO High Performance Detergent at the rate of 1-1/4 oz. to 1-1/2 oz. per 10 gallons of water (refer to machine manual for water equivalents). Alternatively, detergent can be added at a rate of 2-1/2 oz. to 3 oz. per 10 lbs. of garments.

Fabric Finish

For fabrics requiring a soft and supple hand such as cotton sweaters, blankets, golf shirts and woolens, add H₂PRO Fabric Conditioner to the final rinse cycle. For fabrics requiring a firm hand or fabrics which are difficult to press after processing in water such as rayon, linen and cotton, add GELATONE® Fabric Finish to the final rinse. Refer to the product packaging or sales sheet for specific use instructions.

How to Order H₂PRO High Performance Detergent

H₂PRO High Performance Detergent is sold by authorized Street's distributors everywhere. H₂PRO High Performance Detergent is available in single one-gallon containers, cases of four, 5-gallon pails or 15-gallon drums.

Before using any chemical product, review the Safety Data Sheet (SDS) for safe handling and proper disposal.

For professional wetcleaning & laundry use only.
